Purpose:	3
Use case:	3
Error Codes:	4
The API:	4
NPHIES environments:	5
HIDP Response Samples:.....	5

Purpose:

A CHI mandate introduced in January 2020 prohibited Healthcare Providers (HCPs) from requesting health insurance policy details or those of the Health Insurance Company that has issued the policy.

Instead, HCPs were instructed to only use the national identifiers (Saudi national id number (NIN) or Iqama number) to determine the insurer and insurer information using a service on CHI website to find the insurer and policy details.

This document describes the process to retrieve such details.

Use case:

As an HCP is directly integrated with nphies, the HCP processor (Eligibility, Authorization, Claim) can inquire patient's insurance details by submitting patient's ID number (National ID or Iqama) from HCP's HIS.

As a result, details of active policies of the patient will be provided to HCP processor; to proceed with financial transaction submission.

Please refer to the table below to learn more about the details of the policy(ies) that will be available to the HCP.

Table 1 Request Message Data Fields

#	Data Field	Description	Length / Format
1	PatientKey	Saudi NIN or Iqama number. The value is same as the input to API	10 digits

Table 2 Response Message Data Fields

#	Data Field	Description	Length / Format
1	PolicyNumber	Beneficiary Policy Number	250 digits
2	InsuranceCompanyName	Insurance Company Name in English	250 characters
3	InsuranceCompanyNameAr	Insurance Company Name in Arabic	250 characters
4	ClassName	Class Name	50 characters
5	Gender	Beneficiary Gender	"Male" or "Female"
6	DeductibleRate	Beneficiary Deductible / Copay percentage	10 digits
7	MaxLimit	Maximum amount chargeable to beneficiary	10 digits
8	BeneficiaryType	Beneficiary Member Type	"Main" or "Dependent"
9	BeneficiaryTypeId	Beneficiary Member Type Id,	1 digit
